

Wrapped with Hygiene and Freshness – Bosch Milk Powder Packaging.

World-class packaging from Bosch incorporates the highest hygiene standards for your products. Presenting FVS 2051 / FVS 3051 – The easy-to-clean packaging line which meets stringent hygiene requirements for all milk powder products. The servo driven electronically controlled auger filler with the “neutrafill” gas flushing system maintains the least oxygen level in every package thus securing lasting freshness and longer shelf life for your product. Its unique process ensures the milk powder is not exposed to the atmosphere which results in superior and clean packaging cycles. This packaging line is the best in its class in the market today delivering the finest hygiene for your products along with legendary Bosch quality & technology.
